Project

Description	Qty	Rate	Total
Per request from Joann Outland - for new system approach for said property @ 8775 Casanova Atascadero, CA New systems for City of Atascadero must be engineered and approved by the City. This requires perk tests and contact to a civil engineer for design purposes. It is then a estimated cost can be given after design and site visit. These are just estimated costs not knowing design and any unforeseen conditions. Estimate is always subject to change. Accessibility is another task to expansion area.			
Perk testing and Engineer for design can run between 4500.00 to 5500.00 (estimated)		5,500.00	5,500.00
New tank install and leach system can run between - 20,000.00 to 25,000.00 again, not knowing what would be best situation or design for this property.		25,000.00	25,000.00
*Please understand this is only an estimated idea of costs. Hard to exact -until situation is looked at. Equipment will be subject to design and Al's may not be able to accommodate.			
Thank you for your business.	<b>Total</b>		\$30,500.00
